

# JOSHUA WISE

Sidney, Ohio | (937)-622-0063 | wise.113@wright.edu  
linkedin.com/in/joshua-wise | github.com/Joshua-Wise78

## EDUCATION

---

**Wright State University** | *B.S. in Computer Science*

*Fairborn, Ohio* | Expected Dec 2026

**Relevant Coursework:** Data Structures, OS Internals, Cyber Security, Special Topics.

## TECHNICAL SKILLS

---

**Languages:** Python, Java, C/C++, Typescript, HTML/CSS, SQL,

**Frameworks & Tools:** React, Next.js, Flask, FastAPI, Git, Docker, Postgres, MariaDB, Vim, Power BI

## EXPERIENCE

---

**Tenet3 LLC** | *Solutions Intern*

*Dayton, Ohio* | March 2026 - Present

- Develop solutions for multiple different clients. Representing data in unique & useful ways.
- Working through an agile workflow going under multiple PRs & code discussions.

**Wright State University** | *Raider Immersion Intern*

*Fairborn, Ohio* | Dec 2025 - May 2026

- Supporting WSU Take Flight Academy building out training flight software.
- Supporting Booz Allen's **parametric missile modeling** and simulation team to develop and analyze dynamic and kinematic models of missiles and aircraft systems.
- Developing a user-friendly workflow and graphical interface that integrates with an open-source software API to verify program input and validate program output.
- Collaborating with a **multidisciplinary team** to ensure completion of delegated milestones, participating in standups to report progress and perform technical reviews.

**Air Force Research Laboratory (AFRL)** | *Year-round Intern / Full-stack & Data Analysis*

*Fairborn, Ohio* | Mar 2024 - April 2025

- Built a **full-stack** internship portal using Flask, HTML/JS, and Firebase; migrated data from Datastore to Firestore.
- Managed internal datasets and developed Power BI dashboards with DAX to visualize operational costs and usage.
- Automated data workflows to improve customer satisfaction and information accessibility.

## PROJECTS

---

**Route 88** | *Typescript, Flutter, Dart, ORSM, Docker, Postgres*

December 2025 - Present

- Multi-service application based on a microservice architecture.
- Managed Git version control, **conflict resolution**, and feature integrations.
- Team lead of 3 other students working on the **flutter** application using the microservice built.

**The Men** | *Python, Discord.py, Tailscale*

Aug 2025 - Present

- Created a suite of Discord bots to **automate** home server media queries and management.
- Enabled secure remote management of Immich, and Jellyfin services via Tailscale.

## EXTRACURRICULAR LEADERSHIP

---

- **Lead Teaching Assistant** Worked as a teaching assistant for Java I & II leading labs for 3 semesters.
- **Wright State eSports:** Served as **Secretary** (2023-24) managing club logistics, and **Team Captain**, leading strategy for a 5-person competitive team.
- **Hackathon Participant:** Built a self-hosted software called **Box-Notes** to self-host and render markdown notes.
